

Write a JavaScript code that removes duplicate characters from the string.

```
// Example:  
Input : "aabbcc"
```

```
// Output:  
"abc"
```

Write a JavaScript code that counts the number of vowels in the string.

```
// Example:  
Input : "javascript"
```

```
// Output:  
3
```

Write a JavaScript code that removes all special characters (keep only letters and numbers).

```
// Example:  
Input : "hello@123!"
```

```
// Output:  
"hello123"
```
